

What we care about

Making the future, better.

As a trailblazing, leading tech company in radio frequency and x-ray technology, we make a growing contribution to a safer and more secure, more efficient and sustainable world of manufacturing, communication and mobility.

For our customers in the semiconductor & electronics, automotive, aerospace and security industries, we add value with innovative products and data-based services. Realigned, we are on our way to a digital future where we rapidly and reliably deliver what customers need and enable the wise use of limited resources.

What we stand for.

We firmly believe that innovation, in a world of finite resources, makes all our lives better. That is why we work hard with our customers to find solutions that provide sustainable progress and improve safety, security and quality of life for us all.

We want to be the high-tech company of choice for all those who actively shape the future. With our leading-edge technologies, we want to be the go-to partner for the most innovative companies in our markets. We want to be the preferred employer for those who like to get involved, make a difference and explore new territory. We want to be known for solutions and services that deliver high value-added and sustainable progress. We want to achieve strong and profitable growth and generate lasting value for all our stakeholders. As we pursue these aims, we are guided by our long experience and impelled by a keen spirit of discovery and innovation.

**Led by experience.
Driven by curiosity.**
